

ENVIRONMENTAL POLICY

At RSI Systems Furniture we understand our responsibility to do the very best we can to manufacture our products in a way that minimizes our impact on the environment around us. In that regard, the following are some highlights of what we do:

- Certain of our product lines use more than 50% recycled content.
- The wood products for all of our lines use particle board that is made using 100% recycled content.
- We primarily use water-based paints and glues in our Arizona Manufacturing facility.
- Our Arizona manufacturing facility recycles and/or re-purposes approximately 1,000,000 lbs of materials annually.

We consider minimizing our impact on the environment to be one of our companies core values and as such, we are continuously looking for more ways to recycle, prevent pollution, reduce our energy usage and conserve natural resources.
